FY 2017 AUDIT PROGRESS AND FY 2018 INTERNAL AUDIT PLANS

<u>Action Requested</u>: Receive the progress reports for the universities' FY 2017 audit plans and approve the internal audit plans for FY 2018.

<u>Executive Summary</u>: On an annual basis, the Regent universities compile and submit audit plans to the Audit/Compliance and Investment Committee. In accordance with Board policy, these plans review past accomplishments and identify the next fiscal year's internal audit focuses.

Internal audit plans for FY 2018 are based on known circumstances and certain areas needing routine audit coverage. Portions of the plans are unannounced and unplanned to allow the internal auditors flexibility to respond to events that transpire throughout the year and to add audits throughout the year as necessary. In addition, our ethics hotline identifies possible instances of fraud or financial misconduct that would need to be investigated.

non-audit activities, and other responsibilities.

Tables detailing FY 2018 plans and FY 2017 progress for each university are included in this document. Tables containing audits completed for the past three fiscal years may be found on the following pages.

The FY 2018 Internal Audit Plan for all three Regent institutions is based on the following:

- Regent Chief Audit Executive evaluation of plans and guidance from the Board;
- The input of university management personnel, the Auditor of State, and information shared between the three internal audit departments;
- Compilation of institutional risk concerns;
- Risk assessment based on the application of certain risk measurement criteria to the compiled risk concerns; and
- Prioritization based on risk criteria and management input.

The risk assessment performed for FY 2018 identified the following high risk areas:

- · Business processes;
- Computing services;
- New business operations;
- Compliance with departmental policies and procedures in areas where there has been a change of top management and complex office processes; and
- Information technology, particularly in areas of new system development and implementation.
